

PERSONAL PORTFOLIO

GYAGENDA PETER KATABALWA

CODE THERAPIST

Software Developer • Business Automation
Specialist • AI Systems Builder

Founder & CEO, ByteLab Uganda Ltd

I study problems, design
practical systems, and use
software, automation and
artificial intelligence to help
people and organizations
work better.

2026 EDITION

WHO I AM

Developer. Researcher. Builder. Code Therapist.

MY STORY

Gyagenda Peter Katabalwa is a Ugandan software developer, technology researcher and Founder & CEO of ByteLab Uganda Ltd. He began studying Computer Science at Kampala International University in 2024 and has built practical experience through independent systems, business automation, product research and industrial training.

WHY CODE THERAPIST?

“ I do not simply write code. I study the problem, diagnose what the system requires and build a practical digital solution around the people who will use it. ”

01

BSc Computer Science
Kampala International
University

02

1.5+ Years
Practical Experience
Software Development
& Research

03

Founder & CEO
ByteLab Uganda Ltd
Beyond Code.

“

I study problems, design practical systems and use technology to help people and organizations work better.

TECHNICAL CAPABILITIES

Tools I use. Systems I build. Problems I solve.

01

PROGRAMMING LANGUAGES

Python

C#

JavaScript

PHP

Dart

02

AI & DATA

NumPy

Pandas

AI Assistants

Intelligent Automation

03

DEVELOPMENT ENVIRONMENTS

Visual Studio Code

PyCharm

IntelliJ IDEA

Git & GitHub

04

PLATFORMS & SECURITY

Windows

Linux

Kali Linux

Cybersecurity

05

INTEGRATIONS & AUTOMATION

Google Workspace

Google Apps Script

Mobile Money

Payment Gateways

Visa Card Payments

“

From local systems to cloud-connected platforms, I select technologies according to the people, environment and business problem—not simply because they are popular.

”

— Build what works. Improve what matters. —

WHAT I BUILD

Practical digital solutions designed around real people and real work.

01 | MOBILE APPLICATIONS

Android, iPhone and cross-platform Flutter applications for business, education, finance, healthcare and personal productivity.

02 | WEB APPLICATIONS

Responsive browser-based platforms, customer portals, administrative dashboards and cloud-connected management systems.

03 | DESKTOP & LOCAL SYSTEMS

Windows, Linux and macOS solutions that can work locally, securely store information and synchronize when internet becomes available.

04 | PREMIUM WEBSITES & PORTFOLIOS

Professional corporate websites, personal portfolios, business profiles, institutional websites and digital service platforms.

05 | BUSINESS MANAGEMENT SYSTEMS

Systems for sales, purchases, stock, expenses, employees, customers, suppliers, reports and remote operational monitoring.

06 | AI-ENABLED SOLUTIONS

Intelligent assistants, business-support bots, smart search, document processing and automation connected to practical needs.

OFFLINE. ONLINE. CLOUD-CONNECTED.

I select the deployment approach according to the users, available infrastructure, security requirements and future growth.

“ From an idea to a working system, I transform real-world challenges into practical digital experiences. ”

BUSINESS DIGITIZATION & AUTOMATION

Turning daily operations into visible, connected and manageable systems.

I help businesses move from scattered paper records, repeated manual work and limited visibility to structured digital operations. The goal is not to remove people—it is to give teams better tools, reduce avoidable work and help managers make decisions using accurate information.

WHAT A CONNECTED BUSINESS CAN MONITOR

- Sales and income
- Purchases and expenses
- Stock received and issued
- Employees and daily activities
- Customers and suppliers
- Payments and outstanding balances
- Reports and audit trails
- Daily, weekly and monthly performance

HOW I APPROACH THE TRANSFORMATION

REMOTE VISIBILITY

A well-designed management system can allow authorized owners and managers to review business activity from a phone or computer—even when they are away from the physical workplace.

“ Good software should make work clearer, faster and more accountable. ”

Less repetition. Better visibility. Smarter decisions.

BYTELAB ECOSYSTEM & SELECTED WORK

ByteLab Uganda Ltd is the company through which I organize research, product development and practical digital solutions. Its growing ecosystem is designed to serve individuals, businesses and institutions across Uganda, Africa and beyond.

ByteLab Uganda Ltd — Beyond Code.

THE GROWING ECOSYSTEM

01 | Byte AI

Artificial intelligence, assistants and intelligent automation.

02 | Byte Core

Central access, control and visibility across ByteLab products and projects.

03 | Byte Nest

Connected digital spaces, services and organized user experiences.

07 | ByteLab Academy

Accessible technology learning, courses and practical digital skills.

04 | Byte Secure

Cybersecurity, digital protection and safer system practices.

05 | Byte Cloud

Cloud-connected services, synchronization and scalable infrastructure.

06 | Byte Campus

Campus information, academic guidance and student services in one place.

Byte AI, Byte Core, Byte Nest, Byte Secure and Byte Cloud represent the developing ByteLab product and division roadmap.

SELECTED WORK

01

BYTE CAMPUS — IN DEVELOPMENT

Student guidance, timetables, academic resources and campus services.

02

NHS SACCO / TEREKA VAULT — IN DEVELOPMENT

Savings, membership, loans, payments, administration and member access.

03

BYTELAB ACADEMY — PROTOTYPE

Lightweight online learning, registration and administrative monitoring.

04

BYTELIFE — CONCEPT & DESIGN

Personal organization, planning, goals, documents, savings and life tracking.

“ I am building more than individual applications. I am building an ecosystem in which useful products can grow, connect and serve real needs. ”

Research. Build. Connect. Improve.

LEADERSHIP, VISION & CONTACT

Founder & CEO — ByteLab Uganda Ltd
Beyond Code.

LEADERSHIP & GROWTH

I combine software development with research, product planning, technical documentation and business thinking. Through ByteLab Uganda Ltd, I am developing solutions, learning programmes and technology products designed around practical needs.

- 01 — 2024 — Began BSc Computer Science at Kampala International University
- 02 — 2025 — Expanded practical software development and product research
- 03 — 2026 — Founder & CEO, ByteLab Uganda Ltd
- 04 — NEXT — Build useful technology for Uganda, Africa and beyond

OPEN TO COLLABORATION

Software Projects • Business Digitization • AI & Automation • Research • Technology Training • Product Partnerships

MY VISION

I am building the knowledge, systems and company required to create meaningful digital change. My goal is to develop technology that improves how people learn, work, manage businesses and access essential services.
